3 July 1951

MEMORANDUM FOR THE RECORD

SUBJECT: Contract [REDACTED]

25X1A

question raised of the desirability or necessity
of including the standard Government Patent Rights clause

" * * * none of the technicians could truthfully
make the required oath in the patent application that he was the
original and first inventor and does not know or believe that
the device was ever before known or used. * * * design and
technical features of the engine and various other components
of this vehicle were disclosed publicly in an article published
in 1943. * * *"

"The Armed Services Procurement Regulations require
the insertion of a Patent Title or Patent License clause in
contracts involving Government-financed research and development.
Specifications for this contract shows that the Contractor is not
to do or be paid for research and development; rather he is to make an
analysis and report. Therefore, the Patent Title and License
clauses are not required by ASPR's; and these clauses, by their
own wording, would not be applicable to the work contracted for."
